

## System Security

### Data Security

We comply with the Federal Privacy Act and the National Privacy Principles. Our software is constantly monitored and analyzed to provide optimal security and performance.

All communication with our servers is carried out via SSL encryption.

### Physical Security

Australia's largest web hosting provider ensures our servers are physically secured behind several layers of protection, with the data centre being monitored 24 hours a day, 7 days a week.

Authorised access is available only to dedicated team members with appropriate security clearance.

### Technical Information

**Servers:** Located at WebCentral's Brisbane Datacentre

**Database:** MySQL

**Language:** PHP

**Security:** SSL Encryption

**Platform Independent:** Linux, Solaris, Windows
